### LIMITATIONS

This report has been prepared by ClearLead Consulting Limited solely for the use of the Client and those parties with whom a warranty agreement has been executed, or with whom an assignment has been agreed. Should any third party wish to use or rely upon the contents of the report, written approval must be sought from ClearLead Consulting Limited; a charge may be levied against such approval.

ClearLead Consulting Limited accepts no responsibility or liability for:

- the consequences of this document being used for any purpose or project other than for which it was commissioned, and
- the use of this document by any third party with whom an agreement has not been executed.

The work undertaken to provide the basis of this report comprised a study of available documented information from a variety of sources (including the Client) and discussions with relevant authorities and other interested parties. The opinions given in this report have been dictated by the finite data on which they are based and are relevant only to the purpose for which the report was commissioned. The information reviewed should not be considered exhaustive and has been accepted in good faith as providing true and representative data pertaining to site conditions. Should additional information become available which may affect the opinions expressed in this report, ClearLead Consulting Limited reserves the right to review such information and, if warranted, to modify the opinions accordingly.

It should be noted that any recommendations identified in this report are based on information provided by the Client and as gathered during the site survey. In some cases access cannot be granted to all areas of the site, in these instances and in the absence of information to the contrary, ClearLead Consulting Limited will use the information provided to complete the report.

## 1 Introduction

This Screening Statement addresses whether the Jaywick Sands Design Guide Supplementary Planning Document (SPD) produced to support the policies of Tendring's Local Plan 2013-2033 are likely to have significant environmental effects and therefore require Strategic Environmental Assessment (SEA) and Habitats Regulation Assessment (HRA).

In accordance with Regulation 9 (3) of the SEA Regulations, this is the final version of the Screening Statement which finds that SEA nor HRA are not required for the Jaywick Sands Design Guide SPD.

### 1.1 Background Context

Jaywick Sands is listed as a priority area for regeneration in Policy PP 14 of the Tendring District Local Plan 2013-2033. This policy states that:

*'These areas will be a focus for investment in social, economic and physical infrastructure and initiatives to improve vitality, environmental quality, social inclusion, economic prospects, education, health, community safety, accessibility and green infrastructure. As well as this, the Council will seek to: preserve or enhance the heritage assets of these areas, including the at risk conservation areas. The at risk Conservation Areas are: Clacton Seafront, Dovercourt, St Osyth, Thorpe-le-Soken and Thorpe-le-Soken Station and Maltings. The Council will support proposals for new development which are consistent with achieving its regeneration aims.'*

The National Planning Policy Framework (NPPF) 2021 describes Supplementary Planning Documents (SPDs) as:

*'Documents which add further detail to the policies in the development plan. They can be used to provide further guidance for development on specific sites, or on particular issues, such as design. SPDs are capable of being a material consideration in planning decisions but are not part of the development plan'.*

Tendring District Council is preparing a Jaywick Sands Design Guide Supplementary Planning Document (SPD) to provide further 'design' guidance to support the following specific policies within the adopted Tendring District Local Plan 2013-2033 and Beyond, Section 2. These specific policies are:

- SPL 3 Sustainable Design
- LP 3 Housing Density and Standards
- LP 4 Housing Layout

- PPL 5 Water Conservation, Drainage and Sewerage

The Design Guide SPD shows how these policies should be interpreted within the specific context of Jaywick Sands, with regard to its character, layout and setting as well as the requirement to develop flood resistant and resilient buildings. It does not introduce new policy, but instead adds greater detail to the parent policies and is intended to provide further guidance to the adopted Tendring Local Plan which is the planning policy framework for its area. The Tendring Local Plan has been subject to a full Sustainability Appraisal (SA) (including SEA).

SEA is a process for evaluating the environmental effects of a plan before it is made. Under the SEA Directive, SPDs should be assessed to determine whether the plan is likely to have significant environmental effects. Planning Practice Guidance states that SPDs are not required to be accompanied by a Sustainability Appraisal. In exceptional circumstances, an SPD may require an SEA if they are likely to have significant effects on the environment which have not been assessed as part of the Local Plan SA. This Screening Assessment has therefore been prepared to assess if the draft Jaywick Sands Design Guide SPD requires SEA.

Before deciding whether significant effects are likely, the local planning authority (in this case Tendring District Council) should take into account the criteria specified in the SEA Regulations and consult the three environment consultation bodies<sup>1</sup>.

This statement constitutes the SEA Screening as part of the evidence gathering and engagement stage of the Design Guide SPD preparation.

## 2 Strategic Environmental Assessment (SEA) Screening Assessment

To determine if an SPD is likely to have significant effects on the environment, Planning Practice Guidance recommends local planning authorities consider the criteria specified in Schedule 1 of the Environmental Assessment of Plans and Programmes Regulations 2004.

Table 1 presents the criteria in table form and considers each of the criteria in relation to the draft Design Guide SPD.

---

<sup>1</sup> Natural England, Historic England and the Environment Agency

**Table 1: Criteria from Schedule 1 of the SEA Directive to the Proposed SPD**

Criteria		Likely to have significant effects	Screening Assessment / Justification
1 a	The degree to which the plan or programme sets a framework for projects and other activities, either with regard to the location, nature, size and operating conditions, or by allocating resources.	No	<p>The draft Design Guide SPD will promote sustainable development by detailing how four specific policies in the Tendring Local Plan (Policies SPL3, LP3, LP4, PPL5) should be interpreted within the specific context of Jaywick Sands and therefore contribute to the framework for future development consent.</p> <p>The SPD will provide more detail to the policies established in an upper tier plan (i.e. the Local Plan) which has been subject to SA incorporating SEA. Therefore, it is the upper tier plan which sets the framework for development and not the SPD.</p>
1 b	the degree to which the plan or programme influences other plans or programmes including those in a hierarchy	No	The SPD sits at the lowest tier of the development plan hierarchy and therefore does not influence other plans or programmes, instead providing detail for the interpretation of other plans. The SPD will supplement the Tendring Local Plan which is the planning policy framework for the SPD area and which has been subject to a full SA including SEA.
1 c	the relevance of the plan or programme for the integration of environmental considerations in particular with a view to promoting sustainable development	No	The SPD provides more detail to the specific policies established in the adopted Tendring Local Plan as listed in criteria 1a above. It is therefore considered to contribute positively to the integration of environmental considerations.
1 d	environmental problems relevant to the plan	No	The SPD will not introduce or exacerbate environmental problems. It will help mitigate climate change and provide additional guidance on sustainable design, housing layout/density as well as water conservation which will help develop flood resistant and better environmentally designed buildings.
1 e	the relevance of the plan or programme for the implementation of community legislation on the environment (e.g. plans and programmes linked to waste management or water protection)	No	Together with the upper tier plans the SPD provides further detail and guidance on the implementation of community legislation, specifically through the provision of design guidance for water management and ensuring the use of sustainable urban drainage systems in relation to surface water drainage.
2 a	the probability, duration, frequency and reversibility of the effects	No	The SPD supplements adopted planning policy. This has been assessed through the SA of the Tendring Local Plan.

2 b	the cumulative nature of the effects	No	The SPD supplements adopted planning policy. This has been assessed through the SA of the Tendring Local Plan.
2 c	the trans-boundary nature of the effects	No	The SPD supplements adopted planning policy. This has been assessed through the SA of the Tendring Local Plan. The effects of the SPD are limited to the Jaywick Sands area rather than more widely across the district.
2 d	the risks to human health or the environment (e.g. due to accidents)	No	The SPD supplements adopted planning policy. This has been assessed through the SA of the Tendring Local Plan. There are no additional risks to human health or the environment arising from the application of this SPD.
2 e	the magnitude and spatial extent of the effects (geographical area and size of the population likely to be affected)	No	The spatial extent of the SPD is specific to the Jaywick Sands area and will provide supplementary guidance to policies in the adopted Local Plan. Therefore, the influence of the Local Plan is low magnitude and a small spatial extent.
2 f	the value and vulnerability of the area likely to be affected due to: (i) special natural characteristics or cultural heritage (ii) exceeded environmental quality standards (iii) intensive land-use	No	Jaywick Sands lies within the impact zone of Clacton Cliffs & Foreshore Special Site of Scientific Interest (SSSI) and adjacent to the Essex estuary Special Area of Conservation (SAC) and Marine Conservation Zone (MCZ). There are no designated heritage assets in the area covered by the SPD and the coastal areas of Tendring have low quality agricultural land. The value and vulnerability of the SPD area has been considered as part of the Tendring Local Plan SA. This concluded that it is not likely that the SPD will have any significant effect on the value and vulnerability of the area. The SA assessed the relevant policies (Policies SPL3, LP3, LP4 and PPL5) within the Local Plan, against Sustainability Objective 6 (the protection and enhancement of natural, historical and environmental assets), and concluded that there are likely to be significant positive effects on Policies SPL3 and LP4 in terms of enhancement from development and minor positive effects for Policy PPL5 in relation to biodiversity gain associated with SuDS integration. The assessment also concluded that Sustainability Objective 6 was not relevant to Policy LP3 as it relates to housing density.
2 g	the effects on areas or landscapes which have a recognised national, community or international protection status	No	Jaywick Sands lies within the impact zone of Clacton Cliffs & Foreshore Special Site of Scientific Interest (SSSI) and adjacent to the Essex estuary Special Area of Conservation (SAC) and Marine Conservation Zone.

			<p>Consideration of effects on landscape has been assessed through the SA of the Local Plan which concluded that these relevant policies would have positive effects on the quality of the local environment and enhance local character. This excludes Policy LP3 where an assessment is not considered to be applicable as the policy relates solely to housing density.</p>

### 3 Conclusion of SEA Screening

In considering the scope of the Design Guide SPD against the criteria set out in Schedule 1 of the SEA Regulations 2004, it is concluded that the Jaywick Sands Design Guide SPD will not change or introduce new planning policy, proposals or allocations in addition to those already set out in the adopted Local Plan which has been subject to SA/SEA.

Instead, it provides specific guidance relating to design of how certain policies in the adopted Local Plan should be interpreted within the specific context of Jaywick Sands. For example, it provides additional guidance on how new residential development in Jaywick Sands can be designed with regards to internal and external space standards and for flood resistance and resilience.

It is considered unlikely therefore that there will be any significant environmental effects arising from the SPD and for this reason it is concluded that SEA is not required for the Jaywick Sands Place Plan SPD.

### 4 Habitats Regulation Assessment (HRA) Screening Assessment

Consideration has been given to whether HRA screening is required for the draft Jaywick Sands Design Guide SPD.

The policies listed above relating to sustainable design, housing density and standards, housing layout and water conservation, drainage and sewerage, have been subject to HRA as part of the preparation of the adopted Tendring District Local Plan 2013-2033 and Beyond, Section 2. The HRA of Tendring District Local Plan Publication Draft - Section 2 (LUC, October 2018) concludes that there will be no adverse effects on European sites resulting from the policies within the Tendring Local Plan Section 2, either alone or in-combination.

The key issues in the area covered by the Jaywick Sands Design SPD in terms of HRA would be recreation (caused by population increase) and loss of supporting land for birds (i.e. development of new sites). As the SPD is not going to increase the amount of housing and therefore lead to

population increase or lead to housing on new areas or expansion of Jaywick Sands (the SPD has no spatial element) then HRA for the Jaywick Sands Design SPD should not be needed.

## 5 Conclusion of HRA Screening

As the Jaywick Sands Design SPD supports the policies within the Tendring District Local Plan and only provides additional design guidelines for their application in Jaywick Sands, it is concluded that a separate HRA of the Design SPD is not required.

## 6 Consultation

In accordance with Regulation 9 (2) (b), a screening opinion was published alongside the draft Design Guide SPD and sent to the three statutory consultation bodies (Historic England, Natural England, and the Environment Agency) for comment<sup>2</sup>. A response was received from all three statutory consultees<sup>3</sup> who concluded with the Council's opinion that SEA and HRA are not required.

## 7 Screening Determination

The findings from the screening processes have shown it is unlikely that there will be any significant effects arising as a result of the SPD and therefore it is the Council's opinion that neither SEA nor HRA are required. The responses from the statutory consultees agree with this conclusion.

This statement meets the requirements of Regulation 9 (3) of the SEA Regs, as it sets out the reasons for this determination.
