

Tendring District Council Pitch Deliverability Assessment (PDA)

Summary Report

August 2026

Note: It is acknowledged that the new NPPF was published in August 2026 and that this now includes policies and guidance relating to Gypsies and Travellers, and has replaced the PPTS (2024). However, this PDA has been prepared with regard to the policy framework relevant to the Tendring Local Plan Review which is understood to be the PPTS (2024) and the NPPF (2024).

TABLE OF FIGURES

Figure 1 – High-Level PDA Outcomes for Tendring – Full Plan Period Need to 2042/43	7
Figure 2 – High-Level PDA Outcomes for Tendring – Current 5-Year Need	8
Figure 3 – High-Level PDA Outcomes for Tendring – Future Need	8

1. BACKGROUND

- 1.1 Following the completion of the assessment of need in the GTAA ORS worked with the Council to prepare a detailed Pitch Deliverability Assessment (PDA).
- 1.2 The objective of the PDA is to provide robust advice on the suitability, availability and achievability/deliverability of any existing private Gypsy and Traveller sites in Tendring to meet all or a proportion of the current and future accommodation need that has been identified in the GTAA. In addition, in some cases the PDA resulted in changes to the need identified in the GTAA.
- 1.3 Footnote 4 to Paragraph 10 in the PPTS sets out that to be considered deliverable, *sites should be available now, offer a suitable location for development, and be achievable with a realistic prospect that development will be delivered on the site within five years. Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within 5 years, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans.*
- 1.4 Alongside the GTAA, the outcomes of the PDA will assist the Council in preparing their Gypsy and Traveller Local Plan Policies and in determining whether they can demonstrate a 5-year supply.
- 1.5 The PDA has sought to understand the capacity of existing sites to meet levels of need through a combination of desk-based research and engagement with members of the Travelling Community living on sites in Tendring.
- 1.6 Whilst it is only a requirement in the Planning Policy for Traveller Sites (PPTS) to identify a 5-year supply (allocation) for households that were found to meet the PPTS planning definition of a Traveller, the PDA has also looked to identify whether any future need could also potentially be met on existing sites.
- 1.7 Current need refers to those within the first 5-year supply for households, with future need being identified as anything beyond the first 5 years of the planning period.

2. PDA METHODOLOGY

The approach used by ORS sought to complete work to identify whether any existing sites in Tendring are potentially available through intensification, expansion, or reconfiguration to provide additional Gypsy and Traveller pitches to meet the accommodation needs identified in the GTAA. In addition, the PDA has assessed the potential for any unauthorised sites to be granted planning permission.

- ^{2.2} The overall approach taken by ORS to complete the PDA in Tendring is set out below:
- » Assessment of sites with full planning permission, as well as those that are unauthorised.
 - » Evaluation of sites against local development management constraints.
 - » Assessment of sites with regard to their suitability, availability, and achievability of additional pitches (as required by Footnote 4 in the PPTS).
 - » Seeking to understand the site deliverability capacity of Travellers living on sites in Tendring.
- ^{2.3} Based on the experience of ORS in completing PDA's in other local authorities a 4-Stage assessment process was completed in Tendring.

Stage 1 – Initial Review of Sites and Yards

- ^{2.4} ORS completed work to apportion need identified in the 2024 GTAA to each site – including both current need in years 1-5, and future need for the remainder of the Local Plan period to 2042/43.
- ^{2.5} Following this initial work, work was completed to determine which sites had high level planning constraints that would prevent them from being taken forward to the next stage of the assessment.
- ^{2.6} A high level RAG (Red/Amber/Green) rating assessment was completed for each site. As a result of the RAG rating assessment it was determined that one 'Red' Gypsy and Traveller site would be excluded from the next stage of the PDA as it is an unauthorised site and the residents are seeking to move:
- » Land opposite Bucklands.
- ^{2.7} In addition, one further site was excluded from the next stage of the PDA as it is not occupied by Travellers:
- » Land behind Woodfield Bungalow.
- ^{2.8} A total of 7 Gypsy and Traveller sites (33 pitches) were taken forward to the next stage of the PDA:
- » Coppice View.
 - » Esther Lee Stables.
 - » Spring Stables.
 - » Summer View.
 - » The Bucklands.
 - » The Pines.

- » The Rose.

Stage 2 – Detailed Site and Yard Assessment

^{2.9} ORS worked with the Council to complete a detailed Development Management Matrix for each site. This explored in more detail any planning constraints that could prevent the provision of additional pitches and plots. Planning constraints that were considered included, but were not restricted to:

- » Connectivity and Accessibility.
- » Environment and Heritage.
- » Landscape.
- » Land Constraints.

Stage 3 – Engagement with Travellers

^{2.10} Following agreement of the Development Management Matrices with the Council, ORS sought to engage with site owners and site residents to further understand the accommodation needs of the sites. Furthermore, individuals were spoken with over the viability and deliverability of intensifying or reconfiguring sites based on levels of identified need.

^{2.11} This appraisal was only completed for the 7 sites that were taken forward to this stage of the PDA.

^{2.12} In addition, during this phase of the PDA the opportunity was taken to seek to complete GTAA interviews on sites where it was not possible to complete interviews during the fieldwork period for the GTAA, and to update interviews for sites where interviews were completed to support the GTAA.

Stage 4 – Capacity Findings and Site Deliverability Options

^{2.13} The outcomes of Stage 3 were discussed in detail with Officers from the Council to determine, from a planning perspective, whether the sites identified as being suitable for intensification or reconfiguration are acceptable and deliverable (taking account of the requirements of Footnote 4 in the PPTS) to take forward for further consideration in the Local Plan process.

3. PDA OVERALL OUTCOMES

The PDA has sought to identify the likely proportion of current and future need identified for Gypsy and Traveller households in Tendring the period to 2042/43.

- 3.2 Whilst this report only sets out the high-level outcomes from the PDA, a set of detailed PDA Proformas have been prepared setting out in detail the outcomes for each site. These can be found in **Appendix 1**.
- 3.3 During the engagement with Travellers for the PDA a range of generally positive responses were received with many site owners in a position to meet some or all of the need that had been identified in the GTAA.
- 3.4 A summary of types of responses can be found below (these have been anonymised due to data protection requirements).
- » *There is plenty of space for additional mobiles and these can be delivered as soon as planning permission is granted.*
 - » *This site has room to accommodate the required pitches and we are able to deliver them.*
 - » *We have plenty of land to meet all of our current and future needs.*
 - » *The extra pitches we need can be provided as soon as planning permission is granted.*
- 3.5 A further 12 GTAA interviews were completed or updated during the PDA and as a result of the outcomes of these new interviews the overall need figure identified in the GTAA has been adjusted upwards from 38 pitches to 45 pitches. This comprised 33 current need (18 from concealed/doubled up households and single adults or in-migration, 11 from teenagers who will be in need of a pitch in the next 5 years, and 4 unauthorised pitch), and 12 future need from new household formation.

Key Findings

- 3.6 Overall, the high-level outcomes of the PDA suggest that 64% of all identified need for Gypsies and Travellers for the full plan period to 2042/43 could potentially be met on existing sites in Tendring.

Figure 1 – High-Level PDA Outcomes for Tendring – Full Plan Period Need to 2042/43

	Plan Period Need (Pitches)	Plan Period Need Met (Pitches)	% Plan Period Need Met
All Gypsy and Traveller Households	45	29	64%

- 3.7 The table below sets out the high-level outcomes of the PDA for Tendring in relation to current 5-year need for Gypsy and Traveller Households. These are broken down by:
- » 5-year need from all Gypsy and Traveller households that met the 2024 PPTS planning definition of a Traveller that could potentially be met. This is 63%.
 - » 5-year need from all undetermined Gypsy and Traveller households that could potentially be met. This is 100%.

Figure 2 – High-Level PDA Outcomes for Tendring – Current 5-Year Need

	5-Year Need (Pitches)	5-Year Need Met (Pitches)	% 5-Year Need Met
All Gypsy and Traveller households that met the 2024 PPTS planning definition	30	19	63%
All undetermined Gypsy and Traveller households	3	3	100%

^{3.8} The table below sets out the high-level outcomes of the PDA for Tendring in relation to future need. These are broken down by:

- » Future need from all Gypsy and Traveller households that met the 2024 PPTS planning definition of a Traveller that could potentially be met. This is 38%.
- » Future need from all undetermined Gypsy and Traveller households that could potentially be met. This is 100%.

Figure 3 – High-Level PDA Outcomes for Tendring – Future Need

	Future Need (Pitches)	Future Need Met (Pitches)	% Future Need Met
All Gypsy and Traveller households that met the 2024 PPTS planning definition	8	3	38%
All undetermined Gypsy and Traveller households	4	4	100%

APPENDIX 1 – Site Proformas

Site Details	
Site reference and name	Ref: GT01 Coppice View, Carringtons Road, Great Bromley, CO7 7XA
Parish and nearest settlement	Great Bromley Parish, nearest settlement is Great Bromley

Site plan	 The site plan map shows a yellow-shaded area labeled 'Coppice View'. In the top left, there is a blue dot labeled 'Well'. Several orange rectangular shapes represent buildings. In the bottom right, there are two white rectangular shapes labeled 'Existing 9.1 x 3.65m' and two white rectangular shapes labeled 'Proposed 9.1 x 6.1m'. A scale bar at the bottom left indicates 0m, 15.8m, and 30.8m. A north arrow is in the top left corner. The map is sourced from Ordnance Survey 100053143.		
Site area (Ha)	0.385	Site ownership	Private
Site planning status at time of GTAA	Whilst Coppice View does not have planning conditions restricting occupation to Gypsies and Travellers it is accepted by the Council as a long established private Gypsy and Traveller site.		

Surrounding land uses	Countryside/agriculture/farming

Total Need	3
Potential Development Constraints	
Connectivity and Accessibility	
Site accessibility	Whilst this site does not have conditions restricting occupation to Gypsies and Travellers, it is accepted by the Council as a long established private Gypsy and Traveller site. Carringtons Road is a narrow country lane subject to the national speed limit (60mph), there are two site access points, one close to the northern boundary, and a second one close to the southern boundary, both appear to be in use. The southern access point is less than 30m from the bend in the road to the north and therefore insufficient for a sightline distance having regard to the speed of the road and given that the problematic sightline direction is to the north which carries approaching traffic on the left side of the road. It is therefore unclear if suitable vehicular and pedestrian access to the highways network can be achieved. Essex County Council, as highways authority, will undertake a more detailed assessment of the site prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site's suitability or approximate pitch capacity.
Public rights of way	No
Access to education (primary and secondary)	Closest primary school is more than 1200m away Closest secondary school is more than 1200m away
Access to employment sites	Closest designated employment sites are more than 1200m away
Access to shops (retail centre)	Closest designated retail centre is more than 1200m away
Access to GP surgery	Closest GP surgery is more than 1200m away

Access to public transport (bus stop and rail station)	Closest bus stop is within 1200m Closest railway station is more than 1200m away
Connectivity to utilities	The site is in use as an existing Gypsy and Traveller site and it is assumed to have adequate utilities provision. However, this will be subject to confirmation through further detailed assessment prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site's suitability or approximate pitch capacity.
Environment and Heritage	
Ancient woodland and tree preservation orders (TPOs)	Ancient Woodland: No TPOs: No
RAMSAR Sites	No
Sites of special scientific interest (SSSI)	No
Special areas of conservation (SAC)	No
Local nature reserves (LNRs)	No
Local wildlife sites	No
Ecology assessment (KCC)	This site is an existing Gypsy and Traveller site and so it is unlikely to have high ecological value. However, this will be subject to confirmation by the Essex County Council Ecology Team through further detailed assessment prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site's suitability or approximate pitch capacity.
Historic parks and gardens	No

Scheduled ancient monuments	No
Listed buildings	No
Landscape	
National landscape (formerly AONBs)	No
Conservation area	No
Landscape character	Bromley Heaths
Land Constraints	
Strategic Green Gap	No

Coastal Protection Belt	No
Safeguarded Holiday Parks	No
Previously developed land?	Yes

Agricultural land classification	Grade 1, %
Within flood zone 2 or 3?	No
Critical drainage area (KCC)	No
Minerals safeguarding area	Yes
Safeguarding Civil Technical Sites	No
Final Appraisal	
Impact of site on local character (including cumulative impact)	Whilst Coppice View does not have planning conditions restricting occupation to Gypsies and Travellers it is accepted by the Council as a long established private Gypsy and Traveller site. The identified accommodation need associated with this site is for three additional pitches (comprising a current need for two pitches and a future need for one pitch). Based on a desk-based review and site observations, it appears that, subject to relatively minor site reconfiguration, alterations to the internal layout and/or the repositioning of existing structures, the site has sufficient physical capacity to accommodate up to three additional pitches. Notwithstanding this initial assessment, any future proposal for intensification would be subject to a full planning assessment against the Development Plan and all other material considerations. This would include, but would not be limited to, matters relating to residential amenity, highway safety, access and parking arrangements, infrastructure capacity, flood risk, ecological impacts, landscape and visual effects, and the character of the surrounding area.

	Nevertheless, this conclusion is preliminary and should not be taken as confirmation that the site is suitable for allocation or capable of accommodating any specific number of additional pitches. Further detailed assessment work will be undertaken prior to the publication of the Regulation 19 version of the Local Plan. The outcome of this assessment may result in a revised capacity estimate and could ultimately affect the site's suitability for allocation.
Impact of site on amenity of current and future residents (including cumulative impact)	The site is an existing authorised Gypsy and Traveller site and so it is assumed that a reasonable level of intensification will not further impact the amenity of existing or future residents. However, this will be subject to further detailed assessment of the site prior to the publication of the Regulation 19 version of the Local Plan – the outcomes of which may alter this site's suitability or approximate pitch capacity.
Red/Amber/Green rating	Green
Site Conclusions	
Deliverability conclusion	Footnote 4 to Paragraph 10 in the PPTS 2024 clearly sets out the Deliverability Tests that must be considered in relation to a 5-Year Supply. <i>'...to be considered deliverable, sites should be available now, offer a suitable location for development, and be achievable with a realistic prospect that development will be delivered on the site within 5 years. Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within 5 years, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans.'</i> This site has been assigned a Green rating through the RAG assessment process. Sites rated Green or Amber are generally considered capable of meeting the relevant deliverability tests and may therefore contribute towards meeting some or all of the identified need set out in the Gypsy and Traveller Accommodation Assessment (GTAA). Accordingly, the site is considered capable of making a contribution towards identified need of three pitches. This conclusion remains provisional and will be subject to further detailed assessment, including consideration of site layout, amenity, access, infrastructure, environmental constraints, and confirmation of the site's planning status. The outcome of this work may result in a revised assessment of the site's suitability and deliverable capacity.

Level of need conclusion	Total current need for households that meet definition (5 year): 2 Total future need that evidence indicates could be met for households that meet definition: 2 Total residual current need that evidence indicates could not be met for households that meet definition: 0 Total current need for undetermined households (5 year): 0 Total current need that evidence indicates could be met for undetermined households: 0 Total residual current need that evidence indicates could not be met for undetermined households: 0 Total current need for all households (5 year): 2 Total current need that evidence indicates could be met for all households: 2 Total residual current need that evidence indicates could not be met for all households: 0

Minerals safeguarding area	Yes
Safeguarding Civil Technical Sites	No
Final Appraisal	
Impact of site on local character (including cumulative impact)	The site is well screened from public view and an existing authorised Gypsy and Traveller site. It is assumed that a reasonable level of intensification (up to three additional pitches) will not further impact the local character. However, this will be subject to further detailed assessment of the site prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site’s suitability or approximate pitch capacity.
Impact of site on amenity of current and future residents (including cumulative impact)	The site is an existing authorised Gypsy and Traveller site and so it is assumed that a reasonable level of intensification will not further impact the amenity of existing or future residents. However, this will be subject to further detailed assessment of the site prior to the publication of the Regulation 19 version of the Local Plan – the outcomes of which may alter this site’s suitability or approximate pitch capacity.

Red/Amber/Green rating	Green
Site Conclusions	
Deliverability conclusion	Footnote 4 to Paragraph 10 in the PPTS 2024 clearly sets out the Deliverability Tests that must be considered in relation to a 5-Year Supply. <i>‘...to be considered deliverable, sites should be available now, offer a suitable location for development, and be achievable with a realistic prospect that development will be delivered on the site within 5 years. Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within 5 years, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans.’</i> This site has been R/A/G rated as Green. All sites that have been R/A/G Rated as Green or Amber are considered to meet these Deliverability Tests and can therefore be considered as potential supply for some or all of the need identified in the GTAA.
Level of need conclusion	Total current need for households that meet definition (5 year): 3 Total future need that evidence indicates could be met for households that meet definition: 3 Total residual current need that evidence indicates could not be met for households that meet definition: 0 Total current need for undetermined households (5 year): 0 Total current need that evidence indicates could be met for undetermined households: 0 Total residual current need that evidence indicates could not be met for undetermined households: 0 Total current need for all households (5 year): 3 Total current need that evidence indicates could be met for all households: 3 Total residual current need that evidence indicates could not be met for all households: 0

Total (future) pitch need 2028 and beyond	0		
Total Future Need	0		
Potential Development Constraints			
Connectivity and Accessibility			
Site accessibility	The site is an existing authorised Gypsy and Traveller site (apparently accommodating non-travellers following the interviews). It is nevertheless assumed to have suitable vehicular and pedestrian access to the highways network. Essex County Council, as highways authority, will undertake a more detailed assessment of the site prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site’s suitability or approximate pitch capacity.		
Public rights of way	Yes, on the edge of site		

Access to education (primary and secondary)	Closest primary school is more than 1200m away Closest secondary school is more than 1200m away
Access to employment sites	Closest designated employment site is more than 1200m away
Access to shops (retail centre)	Closest designated retail centre is more than 1200m away
Access to GP surgery	Closest GP surgery is more than 1200m away
Access to public transport (bus stop and rail station)	Closest bus stop is within 1200m Closest railway station is more than 1200m away
Connectivity to utilities	The site is an existing Gypsy and Traveller site and so it is assumed to have adequate utilities provision. However, this will be subject to confirmation through further detailed assessment prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site's suitability or approximate pitch capacity.
Environment and Heritage

Safeguarding Civil Technical Sites	No
Final Appraisal	
Impact of site on local character (including cumulative impact)	The site is an existing authorised Gypsy and Traveller site, although it currently accommodates non-Traveller residents. There are dense looking and semi-industrial ad-hoc land-uses on the wider site and indeed the wider 'estate' (car/truck breakage yard(s)/vehicle mechanics etc) – unclear to what extent these uses are authorised, however, the above notwithstanding, the expansion of the existing Gypsy and Traveller site is unlikely to be capable of supporting intensification unless adjoining land uses or adjacent areas (already in other uses) are incorporated into the site –

	therefore introducing uncertainty. Any such potential expansion would require further detailed assessment. Consequently, the site will be subject to additional evaluation prior to the publication of the Regulation 19 version of the Local Plan, the outcomes of which may affect both the site's overall suitability and its indicative pitch capacity.
Impact of site on amenity of current and future residents (including cumulative impact)	Two areas within the wider estate comprise existing authorised Gypsy and Traveller sites, although they currently accommodate non-Traveller residents. Given their established use, it is considered that a degree of intensification is unlikely to result in any significant additional impact on the amenity of existing or future residents. However, this assumption will be subject to further detailed assessment prior to the publication of the Regulation 19 version of the Local Plan. The outcomes of this assessment may influence the site's overall suitability and indicative pitch capacity.
Red/Amber/Green rating	Red
Site Conclusions	
Deliverability conclusion	Footnote 4 to Paragraph 10 in the PPTS 2024 clearly sets out the Deliverability Tests that must be considered in relation to a 5-Year Supply. <i>'...to be considered deliverable, sites should be available now, offer a suitable location for development, and be achievable with a realistic prospect that development will be delivered on the site within 5 years. Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within 5 years, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans.'</i> These sites have been assigned a Red R/A/G rating due to concerns regarding their deliverability and uncertainty over whether they can accommodate any meaningful intensification for the reasons outlined above. In addition, the sites currently accommodate non-Traveller residents, which may further constrain their suitability for future Gypsy and Traveller provision. Consequently, further detailed assessment will be required to determine their potential capacity and overall suitability.

Level of need conclusion	Total current need for households that meet definition (5 year): 0 Total future need that evidence indicates could be met for households that meet definition: 0 Total residual current need that evidence indicates could not be met for households that meet definition: 0 Total current need for undetermined households (5 year): 0 Total current need that evidence indicates could be met for undetermined households: 0 Total residual current need that evidence indicates could not be met for undetermined households: 0 Total current need for all households (5 year): 0 Total current need that evidence indicates could be met for all households: 0 Total residual current need that evidence indicates could not be met for all households: 0

Minerals safeguarding area	No
Safeguarding Civil Technical Sites	No

Final Appraisal	
Impact of site on local character (including cumulative impact)	The site appears well screened in views from Gutteridge Hall Lane and wider landscape vantage points. Appears that there are currently outbuildings/structures on the land. So, provision of a low level of new pitches would not have an overriding adverse impact on the character. There are a high level of authorised and unauthorised traveller/non-traveller pitches along Gutteridge Hall Lane at present. The provision of additional pitches could potentially further erode the rural/semi-rural character of the lane. However, this will be subject to further detailed assessment of the site prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site’s suitability or approximate pitch capacity.
Impact of site on amenity of current and future residents (including cumulative impact)	Residential property to the east, which may be impacted. The quantum of pitches in and around that property, has the potential to cause harm. The size of land (although unclear at this point) appears large enough to accommodate 2 no. pitches. However, this will be subject to further detailed assessment of the site prior to the publication of the Regulation 19 version of the Local Plan – the outcomes of which may alter this site’s suitability or approximate pitch capacity.
Red/Amber/Green rating	Red
Site Conclusions	
Deliverability conclusion	Footnote 4 to Paragraph 10 in the PPTS 2024 clearly sets out the Deliverability Tests that must be considered in relation to a 5-Year Supply. <i>‘...to be considered deliverable, sites should be available now, offer a suitable location for development, and be achievable with a realistic prospect that development will be delivered on the site</i>

All sites that have been R/A/G Rated as Red are considered not to meet these Deliverability Tests and cannot therefore be considered as potential supply for some or all of the need identified in the GTAA.
Level of need conclusion	Total current need for households that meet definition (5 year): 2 Total future need that evidence indicates could be met for households that meet definition: 0 Total residual current need that evidence indicates could not be met for households that meet definition: 2 Total current need for undetermined households (5 year): 0 Total current need that evidence indicates could be met for undetermined households: 0 Total residual current need that evidence indicates could not be met for undetermined households: 0 Total current need for all households (5 year): 2 Total current need that evidence indicates could be met for all households: 0 Total residual current need that evidence indicates could not be met for all households: 2

Site Details	
Site Reference and Name	GT05 Spring Stables, Gutteridge Hall Lane (Spring Caravan Park), CO16 9AS
Parish and nearest settlement	Weeley Parish / Weeley Heath SDB approximately 300m to east

Site plan			
Site area (Ha)	1.18	Site ownership	Private
Site planning status at time of GTAA	Authorised Permanent – eight pitches		

Surrounding land uses	Countryside, Holiday Parks
Site planning history	The site has a long and complex planning history relating to its use as a Gypsy and Traveller site. 2008 (08/00960/FUL) – An application for the change of use of land to allow the stationing of caravans with associated utility/day-room buildings, whilst retaining horse stabling, was refused by the Council on 31 October 2008. However, the reference on later applications indicates that planning permission for one pitch was subsequently allowed at appeal (APP/P1560/A/08/2090227). 2010 (10/00806/FUL) – An application seeking to retain the existing stable block as a day room/utility building and construct a replacement stable block was withdrawn on 19 October 2010. 2011 (11/00475/FUL) – An application for the change of use of the land to a residential caravan site comprising three Gypsy/Traveller pitches with utility/day-room buildings were withdrawn on 10 January 2012. 2012 (12/00129/NMA) – A non-material amendment to reposition a package treatment plant was approved on 5 March 2012. 2012 (12/00692/FUL) – An application to expand the site to eight residential Gypsy pitches (retaining three existing pitches and providing five additional pitches, together with utility/day-room buildings and hardstanding) was refused by the Council on 16 November 2012. However, a later application confirms that this permission was subsequently allowed on appeal.

	2012/2013 (12/00935/FUL) – An application to vary the layout of the pitch permitted under the 2008 appeal decision and change the use of a stable building to a utility/day room was refused on 7 February 2013. 2016 (16/01381/FUL) – An application to vary Condition 3 of the appeal-approved scheme (12/00692/FUL) to allow changes relating to the provision of utility/day rooms was approved on 13 December 2016. 2016 (16/01401/DISCON) – Details submitted pursuant to conditions attached to planning permission 16/01381/FUL, including passing places, landscaping, drainage, amenity space and refuse storage, were approved on 14 December 2016. Summary The site originated as a single-pitch Gypsy and Traveller development granted on appeal following the Council's refusal in 2008. Subsequent attempts to regularise and expand the site were either withdrawn or refused by the Council. The key proposal for an eight pitch Gypsy and Traveller site was refused by the Council in 2012 but later allowed on appeal, establishing the site's current planning basis. Since then, the planning history has mainly involved variations to conditions and the discharge of details associated with the appeal-approved development.

Final Appraisal	
Impact of site on local character (including cumulative impact)	The site is an existing authorised Gypsy and Traveller site and so it is assumed that a reasonable level of intensification will not further impact the local character. The site appears well screened in views from Gutteridge Hall Lane and wider landscape vantage points. Provision of a low level of new pitches would not have an overriding adverse impact on the character, due to the presence of holiday lodges to the east and north of the site. However, there are a high level of

	unauthorised traveller/non-traveller pitches at this site and adjacent. The provision of additional pitches may further erode the rural/semi-rural character of the lane. However, this will be subject to further detailed assessment of the site prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site’s suitability or approximate pitch capacity.
Impact of site on amenity of current and future residents (including cumulative impact)	The site is an existing authorised Gypsy and Traveller site and so it is assumed that a reasonable level of intensification will not further impact the amenity of existing or future residents. However, this will be subject to further detailed assessment of the site prior to the publication of the Regulation 19 version of the Local Plan – the outcomes of which may alter this site’s suitability or approximate pitch capacity.
Red/Amber/Green rating	Amber
Site Conclusions	
Deliverability conclusion	Footnote 4 to Paragraph 10 in the PPTS 2024 clearly sets out the Deliverability Tests that must be considered in relation to a 5-Year Supply. <i>‘...to be considered deliverable, sites should be available now, offer a suitable location for development, and be achievable with a realistic prospect that development will be delivered on the site within 5 years. Final Appraisal	
Impact of site on local character (including cumulative impact)	The site comprises an established authorised Gypsy and Traveller site and, in principle, appears capable of accommodating a limited degree of additional intensification without resulting in significant harm to visual amenity or the wider landscape character. The site benefits from a reasonable level of screening from Gutteridge Hall Lane and from wider public vantage points, which assists in reducing its visual prominence within the surrounding area. In considering the site's suitability, weight has been given to the lawful planning position of the site. On that basis, the provision of one additional pitch is not considered likely, in isolation, to give rise to unacceptable landscape or

	character impacts. However, it is noted that there are a substantial number of existing unauthorised pitches and associated uses both within the wider site and on neighbouring land. The assessment of this site for allocation purposes should not be interpreted as support for, or the regularisation of, any unauthorised development or uses. Furthermore, regard must be had to the cumulative impact of Gypsy and Traveller-related development along Gutteridge Hall Lane. The concentration of authorised and unauthorised pitches in this location has already altered the rural and semi-rural character of the lane to a notable degree. Whilst a single additional pitch may not, by itself, result in material harm, further intensification has the potential to contribute to a continued erosion of the character and appearance of the locality. On balance, the site is considered to have the potential to accommodate a limited level of additional provision, subject to detailed assessment. This conclusion is preliminary and will be subject to further site appraisal work, including consideration of landscape, character, infrastructure, access, amenity, environmental and cumulative impact issues prior to the publication of the Regulation 19 Local Plan. The outcome of that assessment may affect both the site's overall suitability for allocation and its indicative pitch capacity.
Impact of site on amenity of current and future residents (including cumulative impact)	The site is an existing authorised Gypsy and Traveller site (2 no. Pitches only) and so it is assumed that a reasonable level of intensification (1 no. further pitch) will not further impact the amenity of existing or future residents. However, this will be subject to further detailed assessment of the site prior to the publication of the Regulation 19 version of the Local Plan – the outcomes of which may alter this site's suitability or approximate pitch capacity.
Red/Amber/Green rating	Amber
Site Conclusions	
Deliverability conclusion	Footnote 4 to Paragraph 10 in the PPTS 2024 clearly sets out the Deliverability Tests that must be considered in relation to a 5-Year Supply.

	<i>'...to be considered deliverable, sites should be available now, offer a suitable location for development, and be achievable with a realistic prospect that development will be delivered on the site within 5 years. Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within 5 years, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans.'</i> This site has been R/A/G rated as Amber. All sites that have been R/A/G Rated as Green or Amber are considered to meet these Deliverability Tests and can therefore be considered as potential supply for some or all of the need identified in the GTAA. Whilst the site is located in an accessible location and benefits from a reasonable degree of screening from the wider landscape, the cumulative number of authorised and unauthorised pitches along Gutteridge Hall Lane and on this site in particular, many of which are currently subject to cross-departmental enforcement action and investigation. The character of the lane has already been significantly eroded, and further provision would be likely to exacerbate this harm, and could prejudice enforcement action. However, the total need identified here is for one additional pitch and site is considered to have the potential to accommodate this limited level of additional provision, subject to detailed assessment.
Level of need conclusion	Total current need for households that meet definition (5 year): 1 Total future need that evidence indicates could be met for households that meet definition: 1 Total residual current need that evidence indicates could not be met for households that meet definition: 0 Total current need for undetermined households (5 year): 0 Total current need that evidence indicates could be met for undetermined households: 0 Total residual current need that evidence indicates could not be met for undetermined households: 0 Total current need for all households (5 year): 1

	Total current need that evidence indicates could be met for all households: 1 Total residual current need that evidence indicates could not be met for all households: 0

Total (future) pitch need 2028 and beyond	2		
Total Need	2		
Potential Development Constraints			
Connectivity and Accessibility			
Site accessibility	The site is an existing authorised Gypsy and Traveller site and so it is assumed to have suitable vehicular and pedestrian access to the highways network. Essex County Council, as highways authority, will undertake a more detailed assessment of the site prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site’s suitability or approximate pitch capacity.		
Public rights of way	No		
Access to education (primary and secondary)	Closest primary school is within 1200m Closest secondary school is more than 1200m away		
Access to employment sites	Closest designated employment site is more than 1200m away		
Access to shops (retail centre)	Closest designated retail centre is more than 1200m away		
Access to GP surgery	Closest GP surgery is more than 1200m away		

Access to public transport (bus stop and rail station)	Closest bus stop is within 1200m on Clacton Road Closest railway station is within 1200m
Connectivity to utilities	The site is an existing Gypsy and Traveller site and so it is assumed to have adequate utilities provision. However, this will be subject to confirmation through further detailed assessment prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site's suitability or approximate pitch capacity.
Environment and Heritage	
Ancient woodland and tree preservation orders (TPOs)	Ancient Woodland: No TPOs: No
RAMSAR Sites	No
Sites of special scientific interest (SSSI)	No
Special areas of conservation (SAC)	No
Local nature reserves (LNRs)	No
Local wildlife sites	No
Ecology assessment (KCC)	The site is an existing Gypsy and Traveller site and so it is unlikely to have high ecological value. However, this will be subject to confirmation by the Essex County Council Ecology Team through further detailed assessment prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site's suitability or approximate pitch capacity.

Historic parks and gardens	No
Scheduled ancient monuments	No
Listed buildings	No
Landscape	
National landscape (formerly AONBs)	No
Conservation area	No
Landscape character	Clacton and the Sokens Clay Plateau Landscape Character Area (LCA) as defined in the Tendring District Council Landscape Character Assessment. The LCA describes the landscape as a gently undulating clay plateau that is drained by The Holland Brook Valley System in the southeast of Tendring. The LCA has low gappy hedgerows with occasional hedgerow trees that divide arable fields and clayey soils that support moderate/good agricultural land.
Land Constraints	
Strategic Green Gap	No
Safeguarded Open Space (also check Ardleigh, Elmstead Market and Alresford Neighbourhood Plans for any locally designated Safeguarded Open Space)	No No neighbourhood plan is applicable here

Coastal Protection Belt	No
Safeguarded Holiday Parks	No
Previously developed land?	Yes
Agricultural land classification	Grade 3, 0%
Within flood zone 2 or 3?	No
Critical drainage area (KCC)	No
Minerals safeguarding area	No
Safeguarding Civil Technical Sites	No
Final Appraisal	
Impact of site on local character (including cumulative impact)	The site comprises an established authorised Gypsy and Traveller site for what appears to be eight authorised pitches/statics and, in principle, would be capable of accommodating a limited degree of additional intensification without resulting in significant harm to visual amenity or the wider landscape character. The site benefits from a reasonable level of screening from Gutteridge Hall Lane and from wider public vantage points, which assists in reducing its visual prominence within the surrounding area. In considering the site's suitability, weight has been given to the lawful planning position of the site. On that basis, the provision any additional pitches in the future is not considered likely, in isolation, to give rise to

	unacceptable landscape or character impacts. However, it is noted that there are a substantial number of existing unauthorised pitches/statics and associated uses both within the wider site and on neighbouring land. The assessment of this site for allocation purposes should not be interpreted as support for, or the regularisation of, any unauthorised development or uses. Furthermore, regard must be had to the cumulative impact of Gypsy and Traveller-related development along Gutteridge Hall Lane. The concentration of authorised and unauthorised pitches in this location has already altered the rural and semi-rural character of the lane to a notable degree. Whilst additional pitches may not, by itself, result in material harm, further intensification has the potential to contribute to a continued erosion of the character and appearance of the locality. On balance, the site is considered to have the potential to accommodate a limited level of additional provision, subject to detailed assessment. This conclusion is preliminary and will be subject to further site appraisal work, including consideration of landscape, character, infrastructure, access, amenity, environmental and cumulative impact issues prior to the publication of the Regulation 19 Local Plan. The outcome of that assessment may affect both the site's overall suitability for allocation and its indicative pitch capacity.
Impact of site on amenity of current and future residents (including cumulative impact)	The site is an existing authorised Gypsy and Traveller site (8 no. Pitches only) and so it is assumed that a reasonable level of intensification in the future will not further impact the amenity of existing or future residents. However, this will be subject to further detailed assessment of the site prior to the publication of the Regulation 19 version of the Local Plan – the outcomes of which may alter this site's suitability or approximate pitch capacity. Whilst the site is located in an accessible location and benefits from a reasonable degree of screening from the wider landscape, the cumulative number of authorised and unauthorised pitches along Gutteridge Hall Lane and on this site in particular, many of which are currently subject to cross-departmental enforcement action and investigation. The character of the lane has already been significantly eroded, and further provision would be likely to exacerbate this harm and could prejudice enforcement action. However, the total future need identified here is for two additional pitches and the site is considered to have the potential to accommodate this limited level of additional provision, subject to detailed assessment.

Red/Amber/Green rating	Amber
Site Conclusions	
Deliverability conclusion	Footnote 4 to Paragraph 10 in the PPTS 2024 clearly sets out the Deliverability Tests that must be considered in relation to a 5-Year Supply. <i>'...to be considered deliverable, sites should be available now, offer a suitable location for development, and be achievable with a realistic prospect that development will be delivered on the site within 5 years. Sites with planning permission should be considered deliverable until permission expires, unless there is clear evidence that schemes will not be implemented within 5 years, for example they will not be viable, there is no longer a demand for the type of units or sites have long term phasing plans.'</i> This site has been R/A/G rated as Amber. All sites that have been R/A/G Rated as Green or Amber are considered to meet these Deliverability Tests and can therefore be considered as potential supply for some or all of the need identified in the GTAA.
Level of need conclusion	Total current need for households that meet definition (5 year): 0 Total current need that evidence indicates could be met for households that meet definition: 0 Total residual current need that evidence indicates could not be met for households that meet definition: 0 Total current need for undetermined households (5 year): 0 Total current need that evidence indicates could be met for undetermined households: 0 Total residual current need that evidence indicates could not be met for undetermined households: 0 Total current need for all households (5 year): 0

Final Appraisal	
Impact of site on local character (including cumulative impact)	The site has an existing permission to be used as a Gypsy and Traveller site for four pitches. This has resulted in a reasonable impact to the local character. Given this, the built form adjacent to the south and further out to the east, and that the site is well screened on all boundaries, it is considered unlikely that an intensification of this site would result in significant harm to the character of the area.
Impact of site on amenity of current and future residents (including cumulative impact)	The site benefits from an extant planning permission for four large Gypsy and Traveller pitches and is therefore established in this use. There is, however, an adjacent residential property located to the south of the site, the amenity of which would need to be carefully considered in assessing any potential further intensification.

	Based on the information currently available, a limited increase in pitch numbers is not considered likely to result in significant adverse amenity impacts arising from additional vehicle movements, activity levels or noise and disturbance. Equally, there is no clear evidence at this stage to suggest that any resultant built development would necessarily appear unduly dominant or oppressive when viewed from neighbouring properties, although this would be dependent upon the scale, siting and design of any future proposals. It is noted that the site has already undergone a degree of intensification and appears, on a preliminary basis, capable of accommodating at least some of the level of additional provision identified, but perhaps not all of it. This conclusion should be treated with caution, as a full assessment of neighbouring amenity impacts cannot be undertaken without detailed layout and design information. Any future allocation or proposal would therefore need to demonstrate that an appropriate standard of residential amenity can be maintained for both existing and future occupiers.

Final Appraisal	
Impact of site on local character (including cumulative impact)	The site is an existing authorised Gypsy and Traveller site and so it is assumed that a reasonable level of intensification will not further impact the local character. However, this will be subject to further detailed assessment of the site prior to the publication of the Regulation 19 version of the Plan – the outcomes of which may alter this site's suitability or approximate pitch capacity.
Impact of site on amenity of current and future residents (including cumulative impact)	The site comprises an existing authorised/unauthorised Gypsy and Traveller site which appears relatively constrained in physical terms, with a substantial proportion of the available land already occupied by caravans, associated structures and ancillary development. As a result, there may be limited scope to accommodate the full level of additional provision identified (equating to five pitches – including four future need) without risk of overdevelopment or adverse effects on the living conditions of existing and future occupiers. Notwithstanding this, it is recognised that part of the identified accommodation need relates to a teenager within an existing household on one of the authorised pitches. On a preliminary basis, it may be possible for the site to accommodate a modest level of additional provision, such as a single additional touring caravan, without necessarily resulting in unacceptable impacts on residential amenity, site functionality or living conditions. However, this conclusion is indicative only and would be dependent upon the precise siting, layout and operational arrangements proposed. At present, there is insufficient detailed information available to conclude that the site could satisfactorily accommodate the entirety of the identified need. Further assessment will therefore be required to establish the site's capacity and to determine whether any additional provision can be accommodated whilst maintaining an appropriate standard of amenity for existing and future residents.

	This preliminary assessment will be subject to further detailed appraisal prior to the publication of the Regulation 19 version of the Local Plan. The outcome of that work may affect both the site's suitability for allocation and its indicative pitch capacity.
Red/Amber/Green rating	Amber
Site Conclusions	
Deliverability conclusion	Footnote 4 to Paragraph 10 in the PPTS 2024 clearly sets out the Deliverability Tests that must be considered in relation to a 5-Year Supply. <i>'...to be considered deliverable, sites should be available now, offer a suitable location for development, and be achievable with a realistic prospect that development will be delivered on the site within 5 years.
